

# Full Stack Web Development 2

Overview

*Frank Walsh*

*Jan 2026*

Full Stack Web  
Development 2

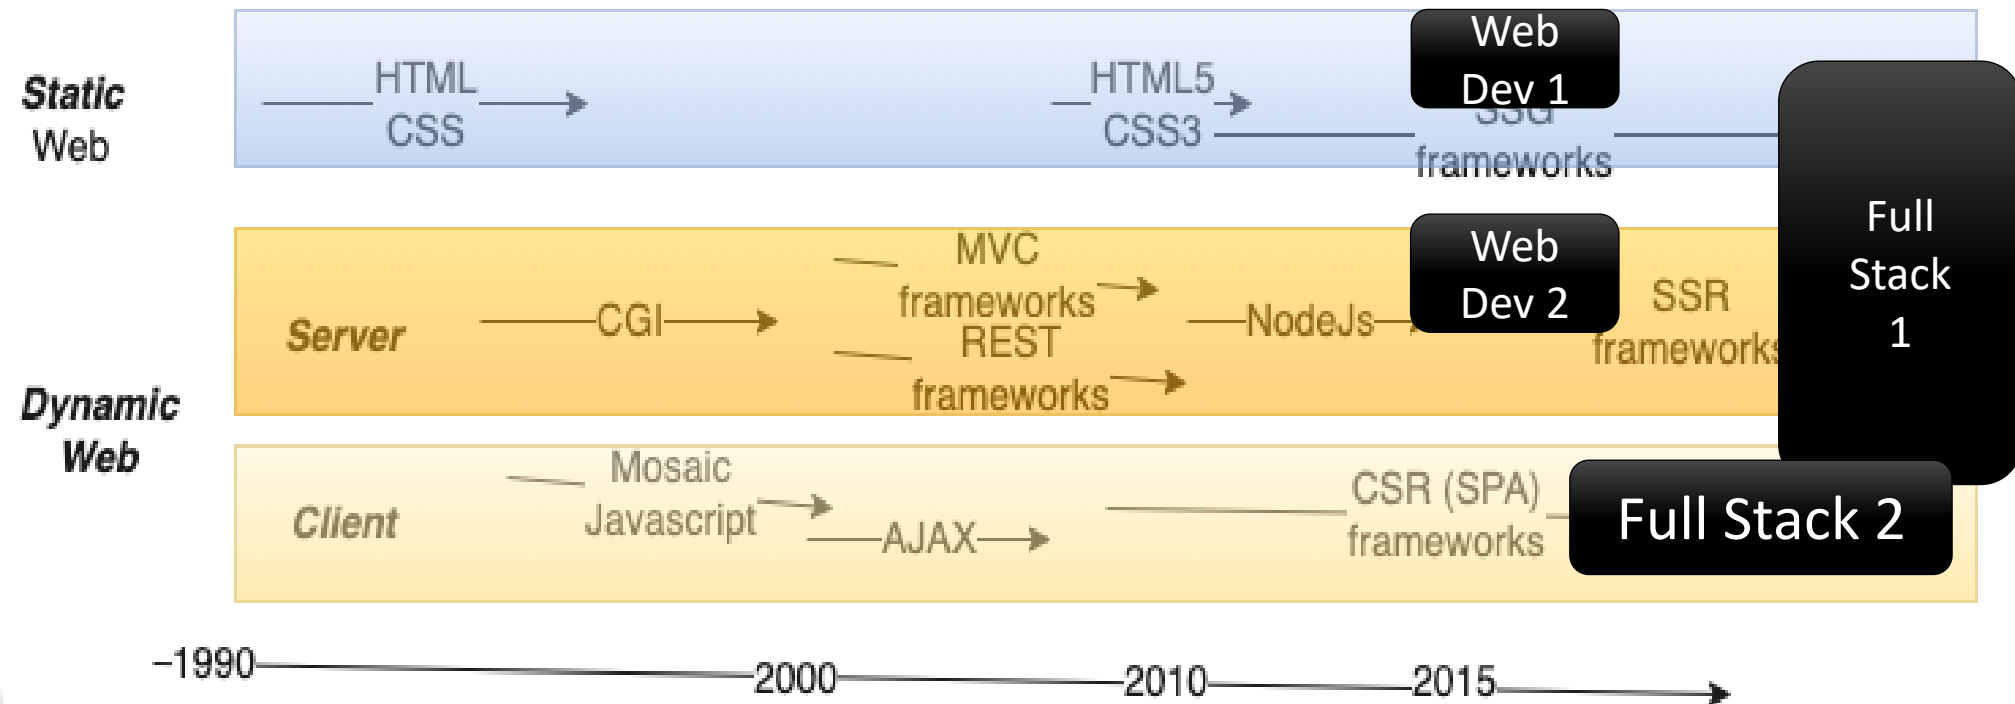

javascript · SPA · react ·  
APIs · front-end

# Context

SSG (Static site generation)  
SSR (Server-side rendering)  
CSR (Client-side rendering)

## *Evolution of the Web platform*

# Full Stack Development 2

*“Design and implement (performant) client-side rendering web apps using industry-standard frameworks and tools.”*

*2.5 Credit Module*

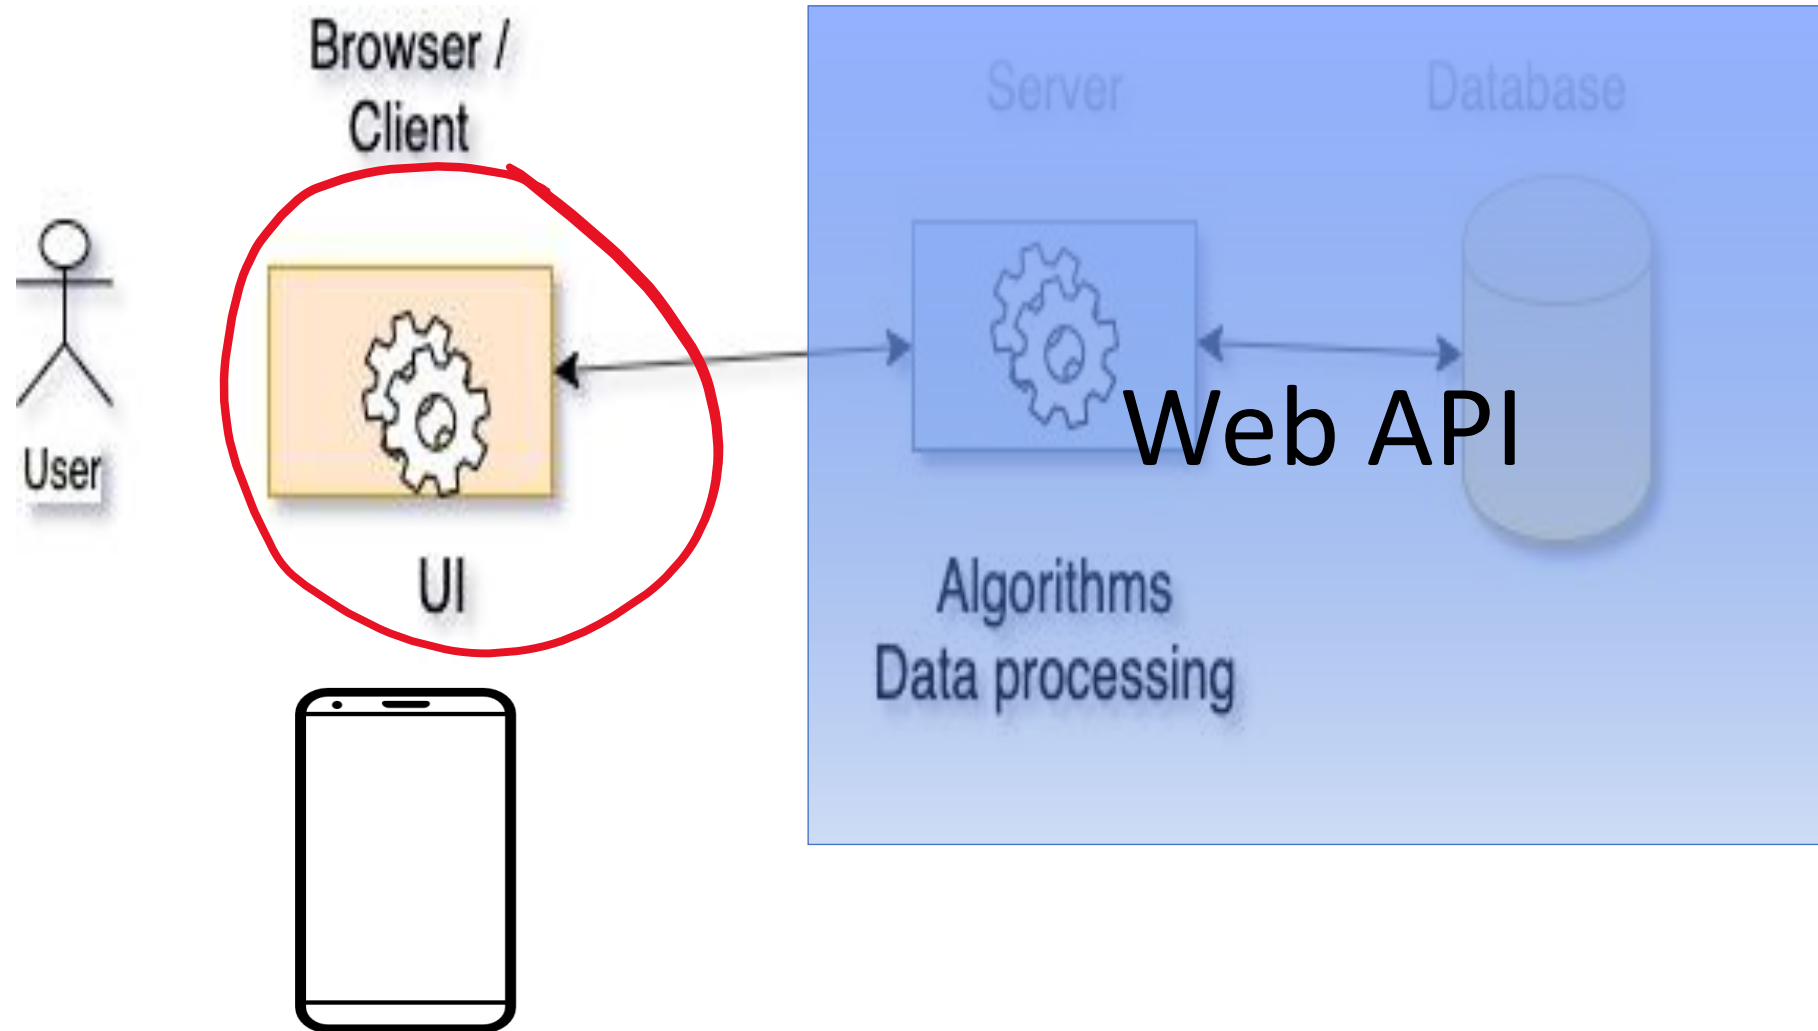

*5 weeks in June*

*100% Continuous Assessment*

# Full Stack Dev 2

# Industry Standard Frameworks

 Storybook 5.0

React

# Why React?

If we're talking **globally and right now**, the most widely used web dev tools break down like this:

## Frontend (UI frameworks/libraries)

### 1. React 🦄

- By far the most widely used frontend library
- Created by Meta (Facebook)
- Huge ecosystem (Next.js, React Native, etc.)
- Massive job market
- Component-based, fast, flexible

### 2. Angular

- Full framework (not just a library)
- Created by Google
- Popular in enterprise apps
- Opinionated, everything included

### 3. Vue

- Easier learning curve
- Very popular in Asia and Europe
- Great documentation
- Smaller ecosystem than React
